

Ogundele, B.O. and Akintekun, G.A. (2007): Knowledge, Attitude and Determinants of Adolescents Sexual Behaviour among Selected Secondary School Students in Kajola Local Government Area of Oyo State, Nigeria. Journal of International Council for Health, Physical Education, Recreation Sports and Dance. Vol. XLIII, No2, Spring, 36-39.

This article examined the knowledge and attitudes and determinants of adolescent sexual behaviours among secondary school students in the Kajola Local Government Area of Oyo State, Nigeria. A descriptive research survey design was used. A total of 600 participants from 5 schools were selected for the study. A self-developed and validated questionnaire ($r=.85$), frequency analysis and chi-square indicated that students had significant knowledge of reproductive health and contraceptives, and that they possessed positive attitudes towards sexuality. Peer groups and poverty were significant determinants of adolescents sexual behavior.
