Application of Health Belief Model in the Use of Modern Birth Control among Secondary School Teachers in Oyo State

This study examined the application of Health Belief using the components of the theory to explain how it affects the use of modern birth control among the secondary schools teachers in public schools. The population of the teachers is made of those teaching in secondary schools in Ibadan North and Ibadan South local government areas. The instruments have equally been developed and administered. It is believed that the results of the study will be beneficial to women in general as their maternal health. The study started in 2018 and it is about 70% completed.
